

Packaging Waste in Ireland in 2019

September 2021

Packaging Waste in Ireland in 2019

Generation

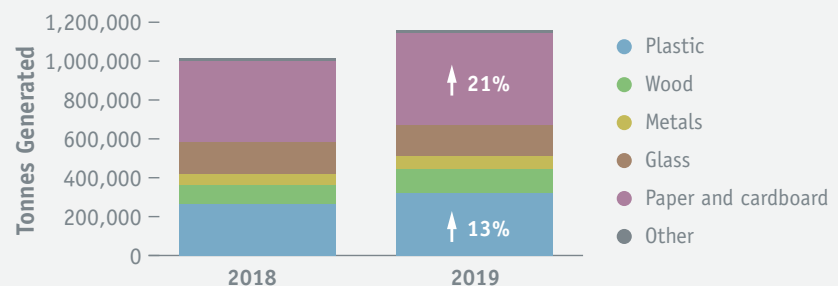

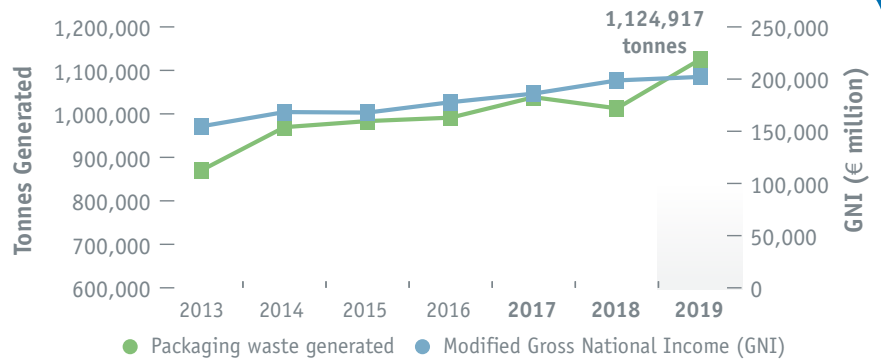

For the third year in a row,
OVER 1 MILLION TONNES
of packaging waste was
generated in Ireland.

↑
11% in 2019

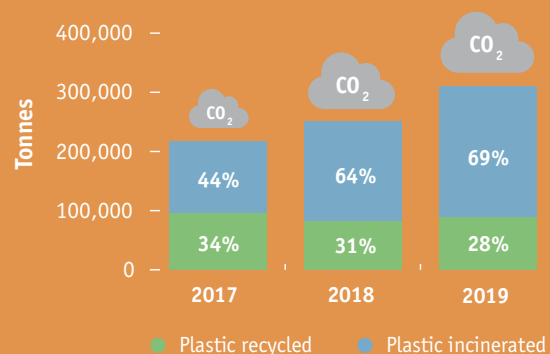

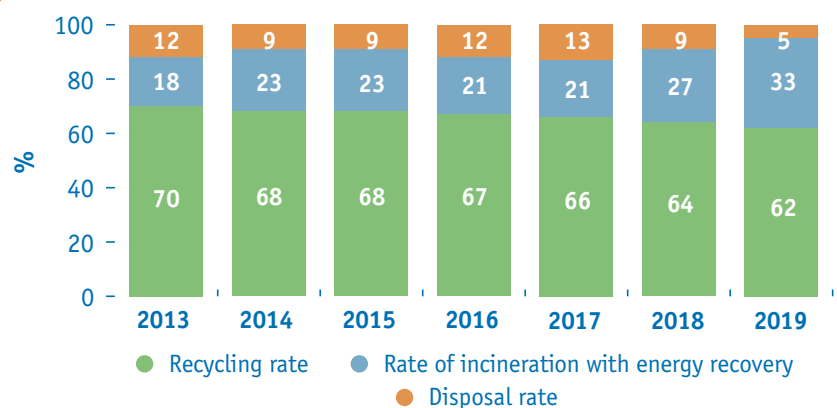

Packaging accounts for **one-third** of all waste collected at kerbside.

Treatment

The share of packaging waste going for incineration with energy recovery increased to **33%** in 2019.

The increase in plastic packaging going for incineration has implications for carbon emissions.

350,100 tonnes CO₂

129,670 tonnes plastic packaging treated at municipal incinerators in 2019

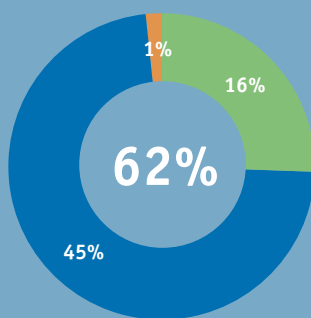

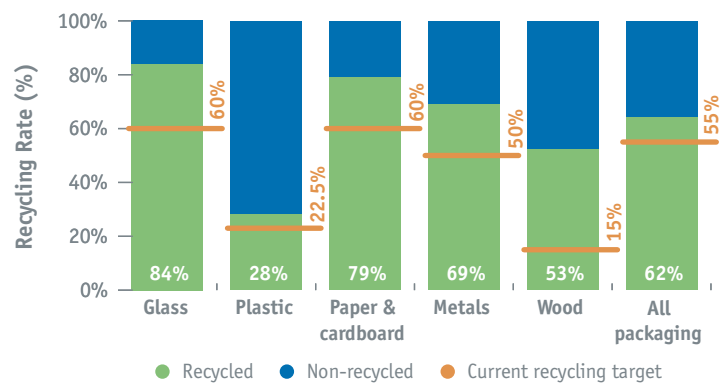

Equivalent to annual CO₂ emissions from a town the size of Kilkenny

Recycling

62% OF IRELAND'S
of packaging waste
was recycled in 2019.

There were **big differences**
in the rate of recycling across
packaging waste types in 2019.

- Recycled in Ireland (%)
- Exported for recycling (%)
- Repaired (wooden packaging)

Exported for Recycling:
mainly paper (33%)
and plastic (7%).

Key actions for Government & Industry

Ireland needs timely implementation of the policy measures in the Waste Action Plan for a Circular Economy.

PREVENT WASTE

strengthen measures to minimise the quantity
of single use packaging placed on the market.

DESIGN FOR CIRCULARITY

identify packaging types prime for replacement
with reusable alternatives, begin phase-in
of alternatives

SUPPORT THE INCREASED USE OF RECYCLED MATERIALS

in packaging including the possible
introduction of a levy on virgin plastic.

INCENTIVISE RECYCLING OVER INCINERATION WITH ENERGY RECOVERY

in line with the waste hierarchy
and circular economy

IMPROVE SEPARATE COLLECTION

of recyclables including roll out of a
deposit-return scheme and expand
Ireland's recycling list

IMPLEMENT BANS and RESTRICTIONS

including those required by the
Single Use Plastics Directive.
